

**ESCAPE GOLD INC.**

## **Escape acquires 2113 hectare south of the Troilus Gold Mine, Quebec**

**November 8, 2010 - Toronto, Ontario, Canada.** President and CEO, T. John Magee is pleased to announce that Escape Gold Inc. (“Escape”) has acquired a second group of claims covering 2113 hectares approximately 110 km north of the mining town of Chibougamou, Quebec and 12 km from the Troilus Gold Mine.

These claims were acquired as a result of the services provided by Les Ressources Tectonic Inc. a privately owned exploration company offering grassroots exploration services to mining companies. These claims were staked to cover numerous untested airborne EM conductors within the Frotet-Evans greenstone belt. Historical reports on this property refer to the Icon gold prospect, described as gold mineralization related to a shear zone over a strike length of 500m. In a separate historical report Falconbridge sited a grab sample grading 7.5 % copper, 0.8% zinc, 1.2 g/t gold and 63 ppm silver.

Escape is currently undertaking a compilation and evaluation of the historical exploration data.

The terms of the service agreement will be the reimbursement of all staking costs to Les Ressources Tectonic Inc. plus the issuance of 50,000 common shares of Escape Gold Inc., subject to regulatory approval.

Escape Gold is a junior exploration company exploring for precious and base metals and seeking opportunities for acquisition or joint venture.
